Personal Projects

Online money Committee System

- This one is my final year project (FYP).
- The app has a committee features like authentication new user, select a category for monthly installment, add personal and account details, customer Dashboard (Where customer can view committee details), admin panel (Where admin can view all the members and all the committees and take a lucky draw for a committee)
- ReactJs, Firebase Firestore, React-Bootstrap, Material UI
online-money-installment.web.app

E-Commerce Shop

- Developed in React technology along with Redux. The app has E-commerce features like add to cart, Delete from cart, increment/decrement quantity, and more
- ReactJs, Bootstrap NPM packages.

YouTube Clone

- This is a clone of YouTube application in which user can sign in/authenticate and redirect to the home page. User can checkout channels, watch videos and see the details of a channel and video.
- ReactJs, Firebase.

NoteApp

- Developed in HTML, CSS and Vanilla JavaScript. The app features are creating note, add note, update note, delete note. The complete CRUD functionality.
- HTML, CSS, JavaScript.
